If it does not pass QA, the data are sent back to the Data Steward for modification.

6. DATA BREACH

1. PURPOSE

Establishing a plan for responding to a data breach, complete with clearly defined roles and responsibilities, will promote better response coordination and help educational organizations shorten their incident response time. Prompt response is essential for minimizing the risk of any further data loss and, therefore, plays an important role in mitigating any negative consequences of the breach, including potential harm to affected individuals.

2. POLICY

WINTER SPORTS SCHOOL shall follow industry best practices to protect information and data. In the event of a data breach or inadvertent disclosure of personally identifiable information, *WINTER SPORTS SCHOOL* staff shall follow industry best practices outlined in the Agency IT Security Policy for responding to the breach. WINTER SPORTS SCHOOL maintained student-level discipline data will be expunged after three years.

8. QUALITY ASSURANCES AND TRANSPARENCY REQUIREMENTS

1. PURPOSE

Data quality is achieved when information is valid for the use to which it is applied, is consistent with other reported data and users of the data have confidence in and rely upon it. Good data quality does not solely exist with the data itself, but is also a function of appropriate data interpretation and use and the perceived quality of the data. Thus, true data quality involves not just those auditing, cleaning and reporting the data, but also data consumers. Data quality at is addressed in five areas:

1. Data Governance Structure

The *WINTER SPORTS SCHOOL* data governance policy is structured to encourage the effective and appropriate use of educational data. The *WINTER SPORTS SCHOOL* data

governance structure centers on the idea that data is the responsibility of all *WINTER SPORTS SCHOOL* sections and that data driven decision making is the goal of all data collection, storage, reporting and analysis. Data driven decision making guides what data is collected, reported and analyzed.

2. Data Requirements and Definitions

Clear and consistent data requirements and definitions are necessary for good data quality. On the data collection side, the *WINTER SPORTS SCHOOL* communicates data requirements and definitions to LEAs through the Data Clearinghouse Update Transactions documentation (see <http://www.schools.utah.gov/computerservices/Data-Clearinghouse.aspx>). The *WINTER SPORTS SCHOOL* also communicates with LEA IT staff regularly, at monthly Data Warehouse Group meetings and at biannual Data Conferences. Where possible, *WINTER SPORTS SCHOOL* program specialists are invited to these meetings and the same guidance is given to the appropriate LEA program directors.

On the data reporting side, the production and presentation layers provide standard data definitions and business rules. Data Stewards coordinate data releases through the Data Stewards Group meetings. All data released includes relevant data definitions, business rules, and are date stamped. Further, Data and Statistics produces documentation, trainings and FAQs on key statistics and reports, such as AYP, graduation rate and class size.

3. Data Collection

Data elements should be collected only once—no duplicate data collections are permitted. Where possible, data is collected at the lowest level available (i.e. at the student/teacher level). Thus, there are no aggregate data collections if the aggregate data can be derived or calculated from the detailed data.

For all new data collections, *WINTER SPORTS SCHOOL* provides to LEAs clear guidelines for data collection and the purpose of the data request. The *WINTER SPORTS SCHOOL* also notifies LEAs as soon as possible about future data collections. Time must be given to LEAs in order for them to begin gathering the data needed.

4. Data Auditing

Data and Statistics Data Analysts perform regular and ad hoc data auditing. They analyze data in the warehouse for anomalies, investigate the source of the anomalies, and work with IT and/or LEAs in explaining and/or correcting the anomalies. Data Analysts also work with School Finance to address findings from the Auditors.

5. Quality Control Checklist

Checklists have been proven to increase quality (See Appendix C). Therefore, before releasing high-risk data, Data Stewards and Data Analysts must successfully complete the data release checklist in three areas: reliability, validity and presentation.

9. DATA TRANSPARENCY

Annually, *WINTER SPORTS SCHOOL* will publicly post:

- *WINTER SPORTS SCHOOL* data collections
- Metadata Dictionary as described in Utah's Student Data Protection Act (SDPA), U.C.A §53A-1-1401

Appendix B. Protecting PII in Public Reporting

Data Gateway Statistical Reporting Method for Protecting PII

Public education reports offer the challenge of meeting transparency requirements while also meeting legal requirements to protect each student's personally identifiable information (PII). Recognizing this, the reporting requirements state that subgroup disaggregation of the data may not be published if the results would yield personally identifiable information about an individual student. While the data used by the *WINTER SPORTS SCHOOL (WINTER SPORTS SCHOOL)* and local education agencies (LEAs) is comprehensive, the data made available to the public is masked to avoid unintended disclosure of personally identifiable information at summary school, LEA, or state-level reports.

This is done by applying the following statistical method for protecting PII.

1. Underlying counts for groups or subgroups totals are not reported.
2. If a reporting group has 1 or more subgroup(s) with 10 or fewer students.
 - The results of the subgroup(s) with 10 or fewer students are recoded as "N<10"
 - For remaining subgroups within the reporting group
 1. For subgroups with 300 or more students, apply the following suppression rules.
 1. Values of 99% to 100% are recoded to $\geq 99\%$
 2. Values of 0% to 1% are recoded to $\leq 1\%$
 2. For subgroups with 100 or more than but less than 300 students, apply the following suppression rules.
 1. Values of 98% to 100% are recoded to $\geq 98\%$
 2. Values of 0% to 2% are recoded to $\leq 2\%$
 3. For subgroups with 40 or more but less than 100 students, apply the following suppression rules.
 1. Values of 95% to 100% are recoded to $\geq 95\%$
 2. Values of 0% to 5% are recoded to $\leq 5\%$
 4. For subgroups with 20 or more but less than 40 students, apply the following suppression rules.
 1. Values of 90% to 100% are recoded to $\geq 90\%$
 2. Values of 0% to 10% are recoded to $\leq 10\%$
 3. Recode the percentage in all remaining categories in all groups into intervals as follows (11-19,20-29,...,80-89)
 5. For subgroups with 10 or more but less than 20 students, apply the following suppression rules.
 1. Values of 80% to 100% are recoded to $\geq 80\%$
 2. Values of 0% to 20% are recoded to $\leq 20\%$
 3. Recode the percentage in all remaining categories in all groups into intervals as follows (20-29,30-39,...,70-79)
